Type of Change: **Temporary**

Subject : REDUCTION IN BOROUGE CHANNEL DEPTH

The charted depth of the Borouge channel is 13.2 meters. However, the latest survey indicates that the available minimum depth in certain areas has been reduced to 12.9 meters.

All vessel masters, pilots, and operators are instructed to take note of the reduced depth and navigate with due caution. Adequate under-keel clearance must be ensured at all times, considering vessel draft, tide, and squat.

Further updates will be issued after completion of dredging or subsequent surveys.

This notice is effective immediately and until further notice.
