PORT MARINE CIRCULAR

NO. 004 of 2011

10th July 2011

**To: Project Contractors
Project Craft Community**

MOORING BUOYS, FENDERS AND OTHER ASSOCIATED EQUIPMENT

Under article 54 of the port regulations to enact law 12 of 1973, the following additional safety measure is imposed. Note that under this article the concerned personnel are required to comply there with.

All such equipment shall be marked, colour-coded or otherwise be identifiable such that the company or vessel owning or deploying the equipment may be readily known; the marking shall be registered with the port authority.

The loss of such equipment, whether in the Harbour, port waters, or on passage to and from the port shall be notified in a reasonable time in writing to the port authority. Where a ship or company is working as part of a particular project within the port, the project manager of that project shall also be informed.

This safety measure is to expand and aid article 20 of the above regulations.
